

CAB29 makes a great all-in-one computer station. Pullout shelves create king-sized keyboard and laptop stations that can be positioned to suit you. Use drawers in your configuration to store media, accessories, or anything else you need.

### It's an open and shut case

This Pullout Cabinet is available with locking doors (CABDR29) or without doors (CAB29). Can-Am cabinets are wide enough to accommodate two stacks of electronic components side by side and CAB29 is perfect for those taller items that most A/V cabinets just can't accommodate - 27" inches of available height will handle any amp or receiver. Large rear cutouts handle all the wiring.

Unlike wood cabinets that actually insulate your AV equipment, Can-Am metal cabinets absorb the heat from your equipment and radiate it away. They don't call Can-Am cabinets cool for nothing! CAB29 is equipped with a series of slats that accept our optional pullout or stationary shelves as well as mini drawers. You can mix and match these drawers and shelves to create just the solution you need. Shelves or mini-drawers can be spaced just about anywhere you need them.

### SPECIFICATIONS

Weight: 50 lbs (65 lbs with locking doors)  
 Cabinet Dim.: 37.75" W x 29" H x 20" D  
 Inside Dim.: 35.75" W x 27" H x 19" D  
 Construction: 20 & 22 ga cold rolled steel  
 Finish: Baked on powder coat  
 Lock: Standard on CABDR29

**Note:** PUDRW Large Pullout Drawers can only be used in CAB29, and cannot be used in CABDR29.

### How Does CAB29 Stack Up?

CAB29 and CABDR29 are part of the family of Can-Am modules that can be configured together to create any configuration. CAB29 and CABDR29 match the exact height of any two 14.5" cabinets (shown below) when they are stacked together, which is useful when stacking cabinets to meet at a common height. Stack any two modules here to line up with a CAB29 or CABDR29.
