

## CADDY1 - Single Length Heavy Duty Caddy

There's nothing as convenient as a heavy duty caddy. Imagine moving your stacked cabinets around when wiring up your equipment or for vacuuming. The caddies also lift your cabinets by six inches, making your bottom drawer a bit more accessible, and raise your cabinets to safety in the event of water intrusion.

Our single length caddy is designed to carry a single stack of cabinets, however tall stacks should remain stationary and be moved very carefully only as required. Remember to lock all cabinets before moving them.

### SPECIFICATIONS:

Weight: 34 lbs Dimension: 37.75" W x 6" H x 20" D

Capacity: Three cabinets high, not exceeding 800 pounds

Construction: 18 & 22 ga cold rolled steel Finish: Baked on powder coat

### FEATURES

- Corner lips keep your base cabinet firmly seated
- Safety brackets that mechanically link stacked cabinets are provided
- Recessed wheels allow caddies to butt up
- Positive locking front wheels with step-on levers.

**CAD1BK** - CADDY1 is available with an optional Black Wheel Set as CAD1BK. Pictured above, this upgrade is popular with darker cabinets.

**CADDY24 / CAD24BK** - Narrow Heavy Duty Caddy

Narrow caddies are also available, for use with our narrow cabinets.  
Dimension: 23.5" W x 6" H x 20" D

Our Heavy Duty Caddies feature flat-plate heavy duty wheels bolted to a welded undercarriage. Two wheels lock with step-on levers. Caddies are designed to move cabinets for vacuuming or to assist in wiring. They are not intended to move cabinets as in house-to-house moving, or in a van. When house moving, your cabinets should be emptied and moved individually. Caddies let you point your TV exactly where you want it, or move it from room to room. Positive locking wheels keep things steady.

## CADDY2 - Double Length Heavy Duty Caddy

### SPECIFICATIONS:

Weight: 52 lbs

Dimension: 75.5" W x 6" H x 20" D

Construction: 18 & 22 ga cold rolled steel

Finish: Baked on powder coat

Capacity: Four MC3D20 or equivalent, not exceeding 1200 lbs.

This caddy is designed to hold two stacks of cabinets, side by side and should be moved carefully.

### FEATURES

- Six wheels with two step-on locking front wheels
- Corner lips keep your base cabinets firmly seated
- Screw-in interlocking cabinet brackets are provided.

**CAD2BK** - CADDY2 is available with an optional Black Wheel set as CAD2BK
