

MC2D20 features oversized 9" high drawers, for media and other items that may be too tall for our standard 6" drawer. It is sized like our 3 Drawer Cabinet (MC3D20) pictured on top of the MC2D20 at left, and will integrate seamlessly into configurations.

Extra Tall for Extra Capacity!

MC2D20 has taller drawers for taller media, oversized CD packaging, medical optical disc, tabbed vinyl sleeves and other items that are between 6 and 9 inches in height. If that's not tall enough, consider HFCAB14, with 12" high drawers.

With Can-Am - You're Ready For Anything

If your media, boxed set, or sleeve storage solution is too tall for a standard 6" drawer, the MC2D20 was made just for you. If you want to store your DVDs vertically, the MC2D20 is the answer - although this means you can't read the spines if labeled normally.

MC2D20 was designed to accommodate DVD sleeves and pouches that store the disc and accompanying artwork, without the bulky case.

MC2D20 includes two stages of divider rod slots to support those taller sleeves or pouches. The lower rods keep them in rows, while the upper rods keep them from falling over sideways. The backstops keep them in check. The drawers can be divided into 2, 4, 5 or 6 rows to match the width of any media product. When ordering dividers and backstops with this cabinet, a double set of rods will be included.

MC2D20 is not just for media either, these 9" deep drawers will hold 80 lbs of whatever you see fit to put in there!

SPECIFICATIONS

Weight: 85 lbs

Cabinet Dimension: 37.75" W x 20.5" H x 20" D

Inside Drawer: 34" W x 9" H x 18" D
