

Metal Tops are available in 16 powder coat colors to match your cabinets perfectly.

Our Metal Top features a one inch overhang at the front and sides, consistent with the look and feel of other furniture. It is flush at the back, so your setup can be placed right up against a wall. Simply place the top over your cabinets for a snug fit that adds virtually no height to the setup.

If you are looking for a stunning top for your TV stand, dresser, or AV furniture - this is it. Metal is also your most eco-friendly choice.

Not Sure When To Use A Mica Top Versus a Metal Top?

Metal Tops are available in the same 16 powder coat colors as our cabinets, so they match perfectly. Mica Tops are only available in 11 mica laminates, laminated to wood. Mica tops are flush with the end of the cabinet it sits on, with no side overhang. This allows them to be used in L-Shaped or U-Shaped setups, like the one at left, where you want to butt a taller stack next to a lower setup. The side overhang on the metal top would get in the way. Mica Tops are also more scratch resistant- just like the Mica Tops on kitchen counters. If you plan to use your top as a working counter surface, you should consider Mica.
