

Nothing Like a good set of wheels

There's nothing as convenient as a set of wheels to provide rear access for wiring up your equipment or when vacuuming. Wheels will let you point your TV exactly where you want it, or move it from room to room. Positive locking wheels keep things nice and steady.

COM2D20X pictured, includes Dividers & Backstops and a set of screw-in Wheels

If it's a computer station you're considering, wheels add convenience and bring the height of a CAB29, or two 14.5 inch cabinets, to 31 inches. Many of our customers consider that perfect monitor height, while allowing the keyboard and desk station to also be ideally positioned.

WHEELS simply replace the levelers that come on most Can-Am cabinets. They are rated for up to 350 pounds and are intended to carry no more than one fully loaded CD storage cabinet. Wheels lift your cabinet off the floor and add two inches in height.

SPECIFICATIONS:

Material: Plastic Height: 2" Weight: 0.5 lbs

FEATURES

- provide 2 inches of lift and mobile convenience
- Wheels simply replace levelers on most Can-Am cabinets
- Set of 4 wheels include 2 locking and 2 non-locking.

SAFETY NOTE

If you are stacking cabinets, you should use a heavy-duty caddy. See the CADDY page for more details.
